

NORDIC XTREME E-BIKE 12V

HERRMANS® frontlight hero Nordic XTREME, with switch for high and low beam, have brought a touch of the technology from the car industry into biking by collaboration with Nordic Lights. Nordic XTREME is the first bicycle head light suitable for all kinds of e-bikes 25km/h-45km/h. Its alloy housing gives an efficient cooling of the LEDs, and the robust glass lens offers extremely good UV- and scratch resistance. It can be mounted on the handlebar with a smart bracket solution. The low beam offers 650 lumens and 120 lux, and the high beam offers 1100 lumens and 250 lux.

Not all products are available in all markets. During continuous improvement specifications and design are changing. All values are nominal values. Illustrations do not necessarily show the design of every version and some features are version specific.

TECHNICAL DATA

Operational Lumens Output	Low beam: 650 lm, High beam 1100 lm	Optical System	Projector
Power Source	E-bike	Operating modes	Low beam / High beam
Nominal Voltage DC	12 V	Mounting Options	Handlebar
Power Consumption	Low beam 10W, High beam 16W	Housing	Alloy
Input connector type	Cable	Salt Spray Test	ISO 9227 240h
Number of LED's	2	Type approval (light)	ECE R113, class B & StVZO
Colour Temperature	5700 K	EMC	EN 15194

KEY FEATURES

- High and low beam with switch
- Suitable for all e-bikes 25-45 km/h
- A powerful and robust frontlight
