HERRMANS

NUCORE TOUR

HERRMANS® lockable NUCORE Tour is the new mini-wing grip for longer tours or if you prefer more support on your ride.

The shape is finetuned for comfort and damping. Minimum pressure on Ulnar nerve in the hand, no obstruction of Carpal tunnel in the wrist.

The inner core is made from bio composite with natural fibres and recycled polypropylene, and the outer layer is a mix of biobased TPE from plant crops and regular TPE. (The raw materials are made from plants grown on soil not fit for food production).

Easy assembly with its lockring, with safe and easy position adjustment. Pattern options are Peak or Wave. Peak pattern includes ribs on the underside for additional grip. Comes in black or grey, pastel and vivid colours upon request. As you can expect from Herrmans, the grips are free from phthalate, PAH, latex and natural rubber. Compliant with ISO/EN 4210-5 Safety Requirements.

Not all products are available in all markets. During continuous improvement specifications and design are changing. All values are nominal values. Illustrations do not necessarily show the design of every version and some features are version specific.

TECHNICAL DATA

Length	**130 mm**
Diameter	**22 Ø**
Weight	**71 g**

Material	**Biobased TPE, Phtalat free, Pah free, Natural rubber free, Latex free**
Density	**2 layers**
Color	**Black, Grey, Brown. Other colours upon request**

KEY FEATURES
