NUCORE

THE NEW BIOBASED GRIP RANGE

Material Data

Inner core: biocomposite with natural fibers and recycled polypropylene.

Outer layer: biobased TPE mix from plant crops.

Raw materials are made using plants grown on soil not fit for food production.

Bioplastic materials reduce the need for fossil-based materials.

For all Riding Styles

TRAIL is the first choice for winding paths and tracks.

TOWN for comfortable rides out and about on town or commuting from one town to the next.

TOUR is the new mini-wing grip for longer tours or if you prefer more support on your ride.

Pattern options: courageous **Peak** or smooth **Wave**. Colors: **Black / Grey**, or colored rides with Pastel and Vivid palettes.

Worldclass Comfort, Hand Ergonomics & Safety

Shapes finetuned for comfort and damping. Minimum pressure on Ulnar nerve in the hand, no obstruction of Carpal tunnel in the wrist.

Lockable grips for easy assembly, with safe and easy position adjustment. **Peak** pattern with added ribs below for additional grip.

Made with food grade materials, free of phthalate, pah, latex and natural rubber. Compliant with ISO/EN 4210-5 Safety Requirements.

A Conscious Choice of Bike Grips
DEVELOPED & MANUFACTURED IN FINLAND
